📋 What These Numbers Mean:

Current Standards Met: How many security standards your facility currently meets out of the total assessed.

Vulnerabilities: Critical security gaps that need immediate attention to meet basic standards.

Standards Lost: Security standards that are compromised due to existing vulnerabilities.

Enhancement Options: Opportunities to exceed baseline security requirements and improve overall posture.

Best Practices: Excellence practices your facility has already implemented beyond basic requirements.

⚠️ Vulnerabilities (Get Started)

Definition: Priority security gaps where your facility does not meet basic security standards. These represent immediate security risks.

Recovery Potential: 21 standards can be recovered by addressing these vulnerabilities.

💡 Enhancement Options (Close the Loop)

Definition: Gaps in current programs and procedures that can further raise your overall security score beyond what you've already achieved.

Recovery Potential: 30 standards can be achieved by implementing these enhancements.

💡 Executive Insights

🎯 Key Takeaway

Your facility has significant security improvement opportunities with 54% implementation. Immediate attention to vulnerabilities is recommended to enhance your security posture.

💡 Top Priority

Address 8 identified vulnerabilities immediately. These represent direct security risks that should be prioritized for remediation.

📈 Quick Win

Start with low-cost, high-impact enhancement options like employee training, signage improvements, or basic security awareness programs.
